Average of Production as per Season

India experiences six major seasons: Autumn, Kharif, Rabi, Summer, Whole Year, Winter. These seasons have a significant impact on agricultural practices and the growth of crops in different parts of the country.

As observed in the map, there are six seasons in India, which are Autumn, Kharif, Rabi, Summer, Whole year and Winter. North side of India experiences Kharif, Rabi & Whole Year seasons. In the south of India there are four seasons likewise Kharif, Rabi, Whole year and Summer. At the middle of the country and in the east side almost all seasons are experienced and on the other side in west Kharif, Rabi, Summer, Whole Year.
